Creating a Dry Garden: Plants that Thrive on Benign Neglect

Come hear renowned garden writer **Ann Lovejoy** talk about her lush garden that thrives on very little water during our dry summers. Learn how you can use her techniques to achieve a garden that is not only beautiful, but practical too.

Beautiful Salvage

Why throw away history and resources? Salvaged building materials can be affordable and gorgeous. See projects by local architects and homeowners that feature salvaged building materials, and hear from a local salvaged materials expert about the philosophy and practicalities of used building materials.

Green and Healthy for Kids

One in five children in the US suffers from asthma, and the EPA lists indoor air quality as one of the top five human health concerns today. Learn to create a haven for new additions to your family, and how to keep your family safe during and after a remodel.

Supergreen: Pushing the Envelope on Green Home Design

Learn techniques that will take your green remodel to the next level. Green roofs, homes that create more energy than they consume, harvesting rainwater on site... technologies and designs that move beyond the conventional.

tuesday
may 10

Free admission! All events at the Central Library Auditorium, 1000 4th Avenue, Downtown Seattle. weekdays, 6-7:30pm.
RSVP and questions: thor.peterson@seattle.gov or 206/615-0731.

This series is sponsored by Seattle Public Utilities Green Home Remodel program and the Northwest EcoBuilding Guild.
